

# Week 2 | Day 1 Internship Report

## ProSensia

---

 **Date:**

6-30-2025

 **Intern Name:**

Hamza Rafique

  **Team Lead:**

Ali Hyder

 **Topic of the Day:**

Introduction to CSS and Types of CSS

 **Objectives:**

- Understand the role of CSS in web development
- Learn the different types of CSS: Inline, Internal, and External
- Apply basic styling to HTML using CSS

 **Summary of Tasks:**

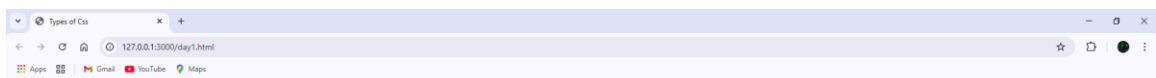

- Attended session on CSS fundamentals
- Practiced linking CSS to HTML documents
- Explored styling elements using all three types of CSS
- Observed visual changes applied via CSS in browser

 **Screenshot of Work:**

## Types of CSS

- Inline CSS
- Internal CSS
- External CSS

## Inline CSS

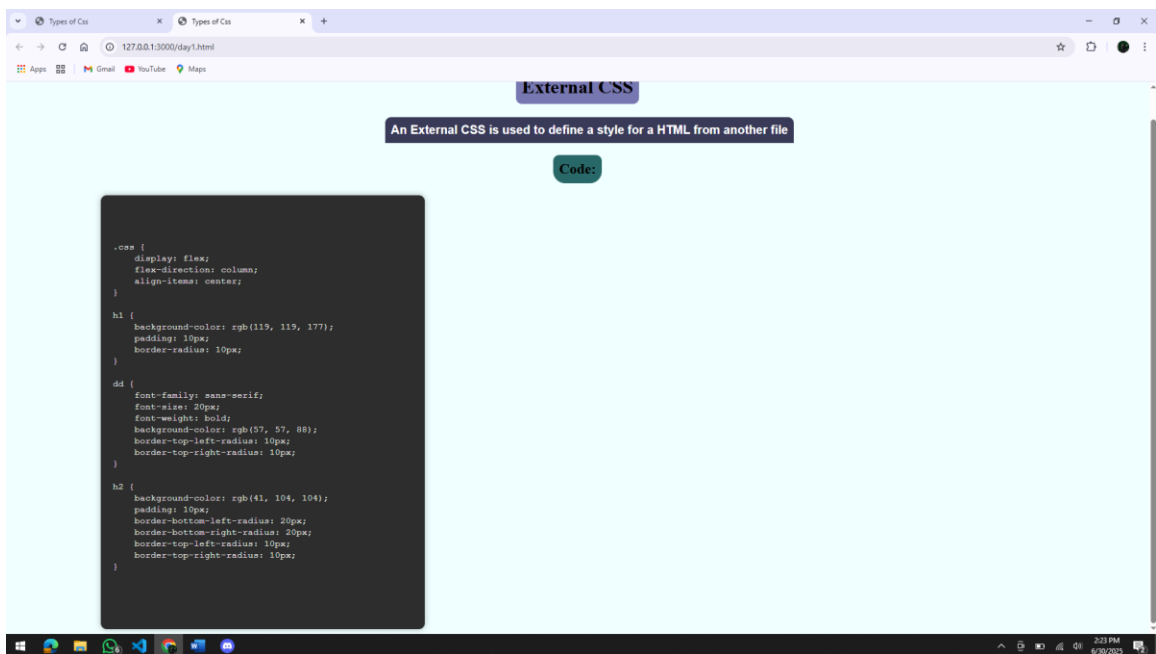

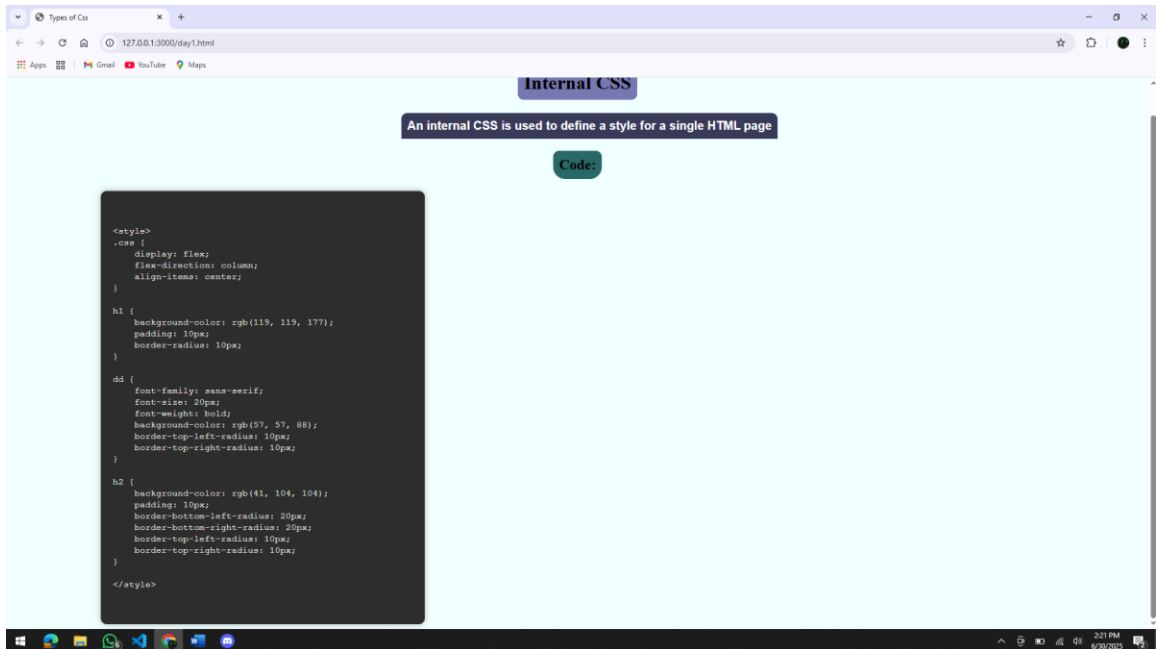

### Inline CSS:

Inline CSS is the technique to define the single element with the insert style sheets in an HTML document

#### Code:

```
<div>
  <h1 style="background-color:blue;font:sans-serif;color:white;font-size: 30px;">Inline CSS</h1>
  <h2 style="font-size:30px; font-family: sans-serif;font-weight: bold;">Inline CSS</h2>
  <div>Inline CSS is the technique to define the single element with the insert style sheets in an HTML document</div>
</div>
```

### Learning Outcome:

Gained foundational knowledge of CSS and its application in web pages. Learned how to organize and apply different CSS styles effectively. Ready to explore more styling properties in upcoming sessions.

## Conclusion:

Today's session laid the groundwork for mastering CSS. The practical exercises helped solidify understanding of linking stylesheets and using CSS syntax. Looking forward to building on this with selectors, colors, and typography tomorrow.
