

## Internship Report

Name: Hamza Rafique

Internship: Front-End Development with ProSensia

Week 1 – Day 7 (Mini Project)

Topic: Mini Project – Build a Basic Static Portfolio Page Using Only HTML and CSS

### Objective:

To apply the learned concepts of HTML and CSS by creating a basic static personal portfolio page that showcases skills, projects, and contact information.

### Introduction:

This mini project was assigned to consolidate the knowledge gained during the first week of the internship. The goal was to build a simple yet structured portfolio website using only HTML and CSS. The project aimed to enhance hands-on practice, code structuring, and layout designing skills without using JavaScript or external libraries.

### Project Highlights:

- Created a responsive and visually appealing static portfolio webpage.
- Used semantic HTML tags for proper structure.
- Designed layout and styling using pure CSS.
- Sections included: Header, About Me, Projects, Services, and Contact.
- Responsive navigation bar and clean layout.

### Tools & Technologies Used:

- HTML5
- CSS3
- VS Code (Code Editor)

### Output / Result:

- A single-page portfolio website.
- Demonstrated good use of CSS properties including Flexbox, Grid, color schemes, padding, margin, and font styling.
- Showcased completed projects and skills.

## Conclusion:

This mini project allowed me to implement what I've learned so far in a creative and structured manner. It helped me understand how to organize code and design real-world webpages. This experience has boosted my confidence in web development.
