ABOUT ME

Motivated and detail-oriented 4th-semester Software Engineering undergraduate with hands-on experience in frontend development gained through a remote internship at CodeAlpha. Proficient in HTML, CSS, JavaScript, and responsive design, with a passion for creating intuitive, user-centric web interfaces. Demonstrates strong problem-solving skills, rapid learning ability, and a commitment to continuous improvement through academic projects. Eager to contribute and grow within the tech industry.

WORK EXPERIENCE

CODEALPHA
Remote
Apr 2025 - May 2025

Intern

Developed responsive web interfaces using HTML, CSS, and JavaScript to enhance user experience and accessibility. Collaborated remotely to implement features based on project requirements, ensuring cross-browser compatibility and performance. Gained hands-on experience translating design mockups into functional pages while demonstrating adaptability and problem-solving in a fast-paced environment.

EDUCATION

PAK-AUSTRIA FACHHOCHSCHULE INSTITUTE OF APPLIED SCIENCES AND TECHNOLOGY
Mang,Haripur
2027

Undergraduate

- Pursuing Bachelor's in Software Engineering with specialization in Web Development, Operating Systems, and Database Systems
- Engaged in academic projects to enhance coding proficiency and problem-solving capabilities
- Maintains a current GPA of 2.8

PROJECTS

Pharmacy Management system

Developed a Pharmacy Management System using HTML, CSS, PHP, and MySQL. The system handles medicine inventory, sales records, customer details, and billing. Implemented user authentication and CRUD operations to ensure secure and efficient data management. Designed a responsive interface for smooth user experience across devices.

Music Player Widget

Created a desktop music player widget using python for Ubuntu integrated with Spotify. Features include play, pause, next, and previous track controls. Designed with a minimal interface to enhance user experience and streamline media control directly from the desktop.

Course Registration System

I have created a simple Course Registration System using HTML, CSS, and JavaScript. It allows students to select courses, displays the selected courses with their credit hours, calculates the total credits, and lets users remove courses if needed.

COURSES

DIGISKILL	●	**Digital Marketing**
DIGISKILL	●	**Graphic Design**
PAF-IAST	●	**Object Oriented Programming**
PAF-IAST	●	**Data Structure and Algorithms**
